To: All Fire Chiefs

From: Gordon Wren Jr., Director
Adam Feuer, Communications Chief

In an effort to enhance how statistics are gathered, as well as to keep up with the modernization of the Fire Control Center, 44-Control implemented a “computer-based” incident reporting system. By using this new system, each and every dispatch, including response times, etc, are logged into a computer. This makes the tracking of calls easier and the entire dispatch and logging process more efficient and professional.

In order to ensure that all Rockland County Fire Departments are 100% compliant with NY State reporting, we request that when your fire department signs off from a call, you also provide the NY State reporting code, applicable to your incident. Below is a partial code list with examples for your use. All fire departments in New York State have been required to utilize the New National Fire Information Reporting System Codes (NFIRS), since January 1, 2003.

For a complete list of all codes please see the next page or contact our office or the New York State Office of Fire Prevention and Control.

“Sign Off Examples”

These codes are in the process of being revised and as soon as completed will be sent out to all Fire Departments.

National Fire Incident Reporting System (NFIRS) Incident Code Guide

100 Series - Fire	200 Series - Explosion, Overheat, No Fire	400 Series - Hazardous Condition, No Fire	600 Series - Good Intent Call
(11) Structure fire 111 - Building fire 112 - Fire in structure, other than in a building 113 - Cooking fire confined to container 114 - Chimney or flue fire confined to a chimney or flue 115 - Indicator overload or malfunction, fire contained 116 - Fuel burner/burner malfunction, fire contained 117 - Commercial compactor fire, confined to contents 118 - Trash or rubbish fire in a structure, no flame damage (12) Fire in mobile property used as a fixed structure 121 - Fire in mobile home used as a fixed residence 122 - Fire in a motor home, camper, or RV as a residence 123 - Fire in a portable building at a fixed location (13) Mobile property (vehicle) fire 131 - Passenger vehicle fire 132 - Road freight or transport vehicle fire 133 - Rail vehicle fire 134 - Water vehicle fire 135 - Aircraft fire 136 - Self-propelled motor home or RV vehicle 137 - Camper or RV fire, not self-propelled 138 - Off-road vehicle or heavy equipment fire (14) Natural vegetation on fire 141 - Forest, woods, or woodland fire 142 - Brush or brush-and-grass mixture fire 143 - Grass fire (15) Outside rubbish fire 151 - Outside rubbish, trash, or waste fire 152 - Garbage dump or sanitary landfill fire 153 - Construction on or demolition landfill fire 154 - Dumpster or other outside trash receptacle fire 155 - Outside stationary compactor or compacted trash fire (16) Special outside fire 161 - Outside storage fire not rubbish 162 - Outside equipment fire 163 - Outside gas or vapor combustion explosion 164 - Outside mailbox fire (17) Cultivated vegetation, crop fire 171 - Cultivated grain or crop fire 172 - Cultivated orchard or vineyard fire 173 - Cultivated tree or nursery stock fire	(21) Overpressure rupture from steam, no fire 211 - Overpressure rupture of steam pipe or pipeline 212 - Overpressure rupture of steam boiler 213 - Overpressure rupture of pressure or process vessel (22) Overpressure rupture from air or gas, no fire 221 - Overpressure rupture of air or gas pipe/pipeline 222 - Overpressure rupture of boiler from air or gas 223 - Air or gas rupture of pressure/process vessel (23) Overpressure rupture from chemical reaction, no fire 231 - Chemical reaction rupture of pressure/process vessel (24) Explosion, no fire 241 - Munitions or bomb explosion (no fire) 242 - Blasting agent explosion (no fire) 243 - Fireworks explosion (no fire) 244 - Dust explosion (no fire) (25) Excessive heat, scorch burns with no ignition 251 - Excessive heat, scorch burns with no ignition	(41) Combustible/flammable spills and leaks 411 - Gasoline or other flammable liquid spill (Class I) 412 - Gas leak (natural gas or LPG) 413 - Oil or other combustible liquid spill (Class II or III) (42) Chemical release, reaction, or toxic condition 421 - Chemical hazard (no spill or leak) 422 - Chemical spill or leak 423 - Refrigeration leak 424 - Carbon monoxide incident (43) Radioactive condition 431 - Radiation leak, radioactive material (44) Electrical wiring/equipment problem 441 - Heat from short circuit (wiring, defective/worn insulation) 442 - Overheated motor or wiring 443 - Breakdown of light ballast 444 - Power line down 445 - Arcing, shorted electrical equipment (45) Biological hazard 451 - Biological hazard, confirmed or suspected (46) Accident, potential accident 461 - Building or structure weakened or collapsed 462 - Aircraft standby 463 - Vehicle accident, general cleanup (47) Explosive, bomb removal 471 - Explosive, bomb removal (48) Attempted burning, illegal action 481 - Attempt to burn 482 - Threat to burn	(61) Dispatched and canceled en route 611 - Dispatched and canceled en route (62) Wrong location, no emergency found 621 - Wrong location (63) Controlled burning 631 - Authorized controlled burning 632 - Prescribed fire (64) Vicinity alarm 641 - Vicinity alarm (incident in other location) (65) Steam, other gas mistaken for smoke 651 - Smoke scare, odor of smoke, not steam (652) 652 - Steam, vapor, fog, or dust thought to be smoke 653 - Smoke from barbecue or tar kettle (no hostile fire) (66) EMS call where party has been transported 661 - EMS call, party transported by non-fire service agency (67) HazMat release investigation where HazMat found 671 - HazMat release investigation, no hazmat condition found 672 - Biological hazard, no hazardous conditions found
	300 Series - Rescue and EMS Incidents (31) Medical assist 311 - Medical assist, assist EMS crew (32) Emergency medical service incident 321 - EMS call excludes vehicle accident with injury 322 - Motor vehicle accident with injuries 323 - Motor vehicle/pedestrian accident (MVP Ped) 324 - Motor vehicle accident with no injuries (33) Lock - In 331 - Lock-in, includes locked vehicles (Lock out use 511) (34) Search for lost person 341 - Search for person on land 342 - Search for person in water 343 - Search for person underground (35) Extrication, rescue 351 - Extrication of victim(s) from building or structure 352 - Extrication of victim(s) from vehicle 353 - Removal of victim(s) from stalled elevator 354 - Trench/below-grade rescue 355 - Confined space rescue 356 - High-angle rescue 357 - Extrication of victim(s) from machinery (36) Water and ice-related rescue 361 - Swimming/recreational water areas rescue 362 - Ice rescue 363 - Swim-water rescue 364 - Surf rescue 365 - Watercraft rescue (37) Electrical rescue 371 - Electrocution or potential electrocution 372 - Trapped by power lines (38) Rescue or EMS standby 381 - Rescue or EMS standby for hazardous conditions	(51) Person in distress 511 - Lock-out 512 - Ring or jewelry removal, no transport to hospital (52) Water problem 521 - Water (not pool) evacuation 522 - Water problem (53) Smoke, other problem 531 - Smoke or odor removal (54) Animal problem or rescue 541 - Animal problem 542 - Animal rescue (55) Public service assistance 551 - Assist police or other governmental agency 552 - Police matter 553 - Public service 554 - Assist invalid 555 - Detective elevator, no occupants (56) Unauthorized burning 561 - Unauthorized burning (57) Cover assignment, standby at fire station, move - up 571 - Cover assignment, standby or move - up	700 Series - False Alarm and False Call (71) Mischief, mischievous false alarm 711 - Municipal alarm system, malicious false alarm 712 - Direct (Ble to fire department, malicious false alarm 713 - Telephone, malicious false alarm 714 - Central station, malicious false alarm 715 - Local alarm system, malicious false alarm (72) Bomb scare 721 - Bomb scare (no bomb) (73) System or detector malfunction 731 - Sprinkler activated due to system malfunction or failure 732 - Extinguishing system activation due to malfunction 733 - Smoke detector activation due to malfunction 734 - Heat detector activation due to malfunction 735 - Alarm system activation due to malfunction 736 - Carbon monoxide detector activation due to malfunction (74) Unintentional system or detector operation (no fire) 741 - Sprinkler activation, no fire - unintentional 742 - Extinguishing system activation 743 - Smoke detector activation, no fire - unintentional 744 - Detector activation, no fire - unintentional 745 - Alarm system activation, no fire - unintentional 746 - Carbon monoxide detector activation (no CO detected) (75) Biohazard scare 751 - Biological hazard, malicious false report
		800 Series - Severe Weather and Natural Disaster (81) Severe Weather and Natural Disaster 811 - Earthquake assessment, no rescue or other service 812 - Flood assessment, no water rescue or other service 813 - Wind storm, tornado/hurricane assessment 814 - Lightning strike (no fire), includes investigation 815 - Severe weather or natural disaster standby	900 Series - Special Incident Type (91) Citizen complaint 911 - Citizen's complaint

These incident type codes are part of the NFIRS standard. For more detailed incident type descriptions, refer to the NFIRS 5.0 Complete Reference Guide, downloadable at www.nfirs.fema.gov.

Revised May 2017

MEMORANDUM

TO: All Fire Chiefs

FROM: Chairman
Rockland County Fire Advisory Board

SUBJECT: State Fire Reporting

I would like to take this opportunity to congratulate the Fire Chiefs of Rockland County for attaining 100 percent participation in the above program for the years 1997 through 2006, 2007 (only 2 Depts missing), 2008 through 2014. Congratulations to Rockland County for accomplishing this feat for the last several years.

County Fire Coordinator Wren was the driving force behind this accomplishment, and we are grateful for his effort. However, there has been some confusion as to why we should submit reports and who is responsible for these submissions.

Below is a copy of the New York State General Municipal Law, Section 204-d, which very clearly answers these questions. Very simply, it is the responsibility of the Chief to ensure these reports are submitted to the Office of Fire Prevention and Control. All Chiefs who take office, either in a village or district, take an Oath of Office to uphold the laws of the State of New York. This is one of them.

I am sure we will continue to attain 100 percent participation for many years to come. If you have any questions concerning the above, please feel free to contact Coordinator Wren or me.

Section 205-d. DUTIES OF THE FIRE CHIEF

The fire chief of any fire department or company shall, in addition to any other duties assigned to him by law or contract, to the extent reasonably possible determine or cause to be determined the cause of each fire or explosion, which the fire department or company has been called to suppress. He shall file with the Office of Fire Prevention and Control of the Department of State a report containing such determination and any additional information required by such office regarding the fire or explosion. The report shall be in the form designated by such office. He shall contact or cause to be contacted the appropriate investigatory authority if he has reason to believe the fire or explosion is of incendiary or suspicious origin.

FIRE SAFETY PROGRAMS

We can provide fire safety programs for students, grades Pre-K to 6. These age and grade appropriate programs feature in-classroom instruction by NYS certified instructors, supporting materials, an emphasis on fire safety and prevention, availability of field trip to Fire Safety Building, and award of Fire Safety Certificate of Merit to each student.

“Fire Safety Building” - This is a full size house which is used for firefighter training (search & rescue and other operations) and public fire safety education. This house features: fire detection systems, residential sprinklers, a smoke machine, various types of doors and windows to practice escape procedures, and a classroom for presentation of films/videos. The structure is built like a ranch house, consisting of: three bedrooms, one bathroom, a kitchen and a living room. Groups are taken through a realistic, simulated fire/smoke situation. Students are taught escape procedures, such as the proper way to use an escape ladder, and what to do when the smoke alarm goes off. We show how smoke travels, as well as about fire itself and its causes.

We also offer other programs such as:

Baby Sitters

Early Warning Devices

E.D.I.T.H. (Exit Drills In The Home)

Home Fire Safety and Mobile Home Fire Safety

Fire Safety for the Elderly, Handicapped

Juvenile Fire Setters

How to use Fire Extinguishers

If you are interested in any of the above mentioned programs, please contact the Fire Training Center at 364-8800.

We also have an Explorer's Post Youth Program for prospective firefighters. For more information on this, contact Mike Conklin at 359-8595 or the Fire Training Center at 364-8800.

FIREFIGHTER TRAINING PROGRAMS

The Rockland County Fire Training Center opened in 1973, thanks to the foresight and efforts of many dedicated fire service leaders. Over the years, we have been educating personnel in fire prevention, protection and suppression.

Our MISSION STATEMENT reads: "TO PROVIDE ROCKLAND FIREFIGHTERS WITH THE REQUIRED SKILLS AND KNOWLEDGE TO ENABLE DELIVERY OF HIGH QUALITY AND COST EFFECTIVE FIRE PROTECTION SERVICES".

We continue to expand and improve our firefighter training programs. We presently offer National Fire Academy Outreach Courses, New York State Office of Fire Prevention and Control Fire Service Outreach Courses, and over 300 Rockland County Fire Training Courses. We can also develop and present courses to meet your special needs. A course catalog, which provides information about our Fire Training Courses, is available upon request.

INDUSTRIAL AND INSTITUTIONAL TRAINING

Business and industry are faced with an ever-increasing number of requirements and regulations. The Rockland County Fire Training Center can assist your firm in complying with these important regulations by providing you and your employees with the knowledge, skills and understanding needed in a variety of topics, including: fire prevention and suppression, emergency planning, evacuation procedures, and hazardous materials. We have developed and delivered many effective training programs for businesses, such as:

Structural Fire Brigade Training
Incipient Fire Brigade Training
High Rise Fire Safety
Fire Safety in Health Care Institutions
Fire Safety in Business Facilities
Fire Extinguisher Training

"Fire Extinguisher Training at Your Facility!" - The Occupational Safety and Health Act (OSHA) requires that you provide training in the use of fire extinguishers if you provide extinguishers at your facility. To assist the business community, we have purchased a state-of-the-art portable fire training simulator which allows us to bring our important fire extinguisher training program to your site. This simulator, is completely self-contained and allows our instructors to give your employees "hands-on" practice with all types of fire extinguishers under safe, controlled live fire conditions. This training simulator uses clean burning propane to fuel various props that simulate Class A, Class B, and Class C fires. We can use your fire extinguishers or bring our own extinguishers for the program.

If you are interested in any of the above mentioned programs please contact the following: For information on **Firefighting Training Programs** please contact Peter Byrne, Coordinator, Fire Instructors. For information on **Industrial And Institutional Training Programs** please contact George Drescher, Industrial Training Coordinators, at the Rockland County Fire Training Center, 845-364-8800.

National Safety Council 6 Hour Defensive Driving Course

- 10% Insurance Reduction on Liability & Collision Premiums •
- Up to 4 points reduction from NYS Drivers License •

PETROLEUM SPILL GUIDANCE AT A GLANCE

Petroleum spills must be reported to DEC within two hours of discovery, with one minor exception involving small spills. To fit within the exception, a small spill must meet **all** of the following criteria:

- The spill is known to be less than five gallons;
- The spill is contained and under the control of the spiller;
- The spill has not and will not reach the State's water or any land; and
- The spill is cleaned up within two hours of discovery.

If a spill does not satisfy all of these criteria, it must be reported to the DEC Hotline

Revised May 2017

SPILL RESPONSE PROTOCOL

- The New York State Department of Environmental Conservation (DEC) (1-800-457-7362 or via 44-Control) should be notified for all petroleum and chemical spills, despite the amount spilled, and obtain a spill number.
- Once a spill number has been obtained from the DEC, the caller should receive a callback from the DEC's on-call spill engineer within 20 minutes who will provide guidance on the necessary action required.
- The Rockland County Health Department **must** be notified of the spill through 44-Control. They will make a decision if a response is required.

NOTE: The properly trained fire department personnel should only eliminate source and contain the spill. They are not responsible to clean up or transport the spilled material to an approved disposal site.

RESPONDING TO SPILLS

- **Obtain wind direction and speed** from 44-Control.
- **Secure the scene** -- prevent unauthorized entry.
- **Set up Hot Zone** -- only properly trained personnel shall enter this area.
- **Establish a command post** -- upwind and in a safe location.
- **Identify the hazard** -- placards, container labels, shipping documents, MSDS, etc.
- **Assess the situation** -- consider the following:
 - Is there a fire, a spill or a leak?
 - What are the weather conditions?
 - What is the terrain like?
 - Who/what is at risk: people, property or the environment?
 - What actions should be taken: Is an evacuation necessary? Is diking necessary? What resources (human and equipment) are required and are readily available?
 - What can be done immediately?
 - Firefighters need to be certified in Hazardous Materials First Responder Operations level to legally perform any defensive tactic or function.
 - For offensive functions, the firefighters need to be certified at the Hazardous Materials First Responder Technician level.

Information needed prior to contacting Chemtrec – call 1-800-424-9300 or via 44-Control.

- Your name, call back telephone number, 44-Control fax number
- Location and nature of problem (spill, fire, etc.)
- Name and identification number of material(s) involved
- Shipper/consignee/point of origin
- Carrier name, rail car or truck number

- Container type and size
 - Quantity of material transported/released
 - Local conditions (weather, terrain, proximity to schools, hospitals, waterways, etc.)
 - Injuries and exposures
 - Local emergency services that have been notified
- The New York State Department of Environmental Control (DEC) should be notified for all petroleum and chemical spills, despite the amount spilled, and obtain a spill number (spill hotline number is 800-457-7362 or via 44-Control).
 - Once a spill number has been obtained from the DEC, the caller should receive a callback from the DEC's on-call spill engineer within 20 minutes who will provide guidance on the necessary action required. If a return call is not received within 20 minutes, then another call should be made to the DEC.
 - Request that 44-Control contact the Rockland County Health Department and notify the on-call Health Department engineer of the spill. He/she will make a decision if a response is required or corrective action can be handled over the telephone.

NOTE: The properly trained fire department personnel should only mitigate the spill. They are not responsible to clean up or transport the spilled material to an approved disposal site.

EMERGENCY SERVICES GUIDELINES FOR D.O.T. ASSISTANCE

The following guidelines should be utilized when emergency response organizations require the assistance of the Rockland County Division of the New York State Department of Transportation to the scene of an emergency on State highways.

- The employees of the Rockland based New York State Department of Transportation are not trained in hazardous materials response and cannot engage in spill cleanup.
- An incident that requires the Department of Transportation (DOT) assistance could include a spill, tree down, road obstruction, etc.
- When assistance is required, the following should take place:
 - Call Radio Headquarters (44-Control) and request a DOT supervisor to contact the on-scene Incident Commander. The Incident Commander must provide 44-Control with a call back number.
 - Explain to the DOT supervisor the nature of the request, i.e., a truck rollover with a fuel spill on Rte. 9W and requesting traffic barricades for a road closure.
 - The supervisor will either respond to the scene or dispatch the equipment requested by the Incident Commander.
 - The supervisor will provide an estimated time of arrival.

- There could be a substantial delay during adverse weather conditions because crews are limited and assigned to other emergency tasks. There could also be a delay off hours and on holidays.
- One of the big requests is for sand to absorb a fuel spill. The DOT recommends that speedy dry be used to absorb a spilled material. Sand should only be used to dyke a spilled material or applied to the road surface for traction of a vehicle.

NOTE: The DOT will not remove sand, speedy dry, etc. when used at a fuel, motor oil, hydraulic oil or hazardous material spill.

USE OF BIOSOLVE

- Should the fire department decide to clean up a small hydrocarbon spill, BioSolve can be used provided the following is complied with:
 - BioSolve is to be used on surface (roadway, cement, blacktop) only. It should not be used on spilled material in a waterway, storm drain or on soil. With one exception, it can be used in storm drains and sewers if the primary purpose is to prevent an explosion. For example, a gasoline spill enters a storm drain and there is a concern of a fire/explosion, then BioSolve can be used.
 - BioSolve can be used on a spill and disposed of in the ordinary trash when the following is complied with:
 - When the spill is a hydrocarbon only.
 - BioSolve/water solution must be applied to the spilled material first and agitated.
 - Speedy dry must then be placed over the spilled area that was treated with BioSolve.
 - The maximum amount of speedy dry and BioSolve that can be disposed of is 220 lbs. This is about ½ of a 55-gallon drum.
 - BioSolve use on waterways or in storm drains:

Small Spill

- BioSolve “shall not be” used on a petroleum spill in a waterway, unless authorized by the New York State Department of Environmental Control (DEC) or the United States Coast Guard.

Large Spill

- If a spill exceeds a total of 220 lbs. of BioSolve, speedy dry and spilled material during a clean up, then a spill contractor must be notified by the spiller or the DEC.

MERCURY SPILL

All spills of mercury from a home fever thermometer or home thermostat can be cleaned up by the homeowner. They can obtain information on how to clean up a small mercury spill from the New York State Health Department (www.nyhealth.gov/nysdoh/enviro/hsees/mercury) or by calling 800-458-1158,

Ext. 2-7810. The fire department should not have any involvement. The typical fever thermometer contains about a half gram of mercury.

If the amount of mercury spilled is larger than what is expected from a fever thermometer or home thermostat, then the County Health Department or Hazmat officer needs to be contacted and the area evacuated until it is cleaned.

- Compact Fluorescent Bulb's contain small amounts of Mercury: about 1/100 the amount in a common household thermometer.
- What to do if one breaks?
 - Do Not inhale vapor
 - Do Not use a vacuum for cleanup
 - Sweep the pieces together with brush or broom – NOT with your hand.
 - Clean glass with wet rag or towel and place the towel along with glass into sealed plastic bag, and take to Household Hazardous Waste. (Open Mon-Fri 8 AM – 1 PM).

NOTE: The fire department should not be cleaning up a mercury spill.

DECONTAMINATION

In the event that a resident or emergency worker comes in contact with a hazardous substance and requires immediate gross decontamination (decon), the fire department should call but not wait for the arrival of County Hazmat. They should perform the following:

- Should the victims require immediate decon, then proceed without setting up a containment pool. Keep in mind that protection of life comes first and there should not be any delay in providing decon.
- If time permits, set up a decon pool to capture the water or liquid runoff.
- Decon support units can be dispatched to the scene from the County Hazmat Team and the following local fire Departments: Nyack, Suffern and West Haverstraw. The Hazmat Team should be notified for all requests for decon support.
- Stationary decon units are located at Nyack and Good Samaritan Hospitals. Have 44-Control notify the emergency room of the receiving hospital that a contaminated victim is enroute and what level of decon was provided at the scene.
